

Power BI Dashboard - Page 1

Executive Overview | Visual Build Guide

Mutual Fund Analytics Platform * mf_analytics_dashboard.pbix * Azure SQL * 2026-06-01

10 Steps * 10 Visuals * 38 DAX Measures pre-built

Canvas: 1280 x 800 px * Import Mode

What gets built on Page 1 - Executive

Step	Visual	Description
Step 0	Page & Canvas Setup	Before adding any visuals
Step 1	Header Bar	Blue gradient title bar (top)
Step 2	Toolbar Strip + Asset Slicer	White bar with class filter tiles
Step 3	3 x KPI Cards	AUM * Beating Nifty * Best Risk-Adjusted
Step 4	MetricSelector Slicer	CAGR 1Y / 3Y / 5Y / Sharpe / Alpha tiles
Step 5	Fund Ranking Bar Chart	Horizontal bars, dynamic sort by metric
Step 6	Risk vs Return Scatter	Signature 4-quadrant scatter chart
Step 7	Needs Attention Table	Worst Sharpe + high drawdown funds
Step 8	Asset Class Mix Donut	Equity / Index / Gold / Liquid split
Step 9	Fund Performance Matrix	Full-width table, colour-coded all metrics
Step 10	Footer Bar	Page indicator + pipeline status

- PRE-REQUISITES before building visuals:
1. All 38 DAX measures already deployed to Executive_measures table via PowerBI MCP.
 2. Apply theme: View -> Themes -> Browse -> powerbi/theme_mf_analytics.json
 3. Set canvas: File -> Options -> Report settings -> Custom -> 1280 x 800 px
 4. Rename page tab to 'Executive' and set tab color #0078D4.

Step 0

Page & Canvas Setup

Page name	Executive
Tab color	#0078D4
Canvas	Custom 1280 x 800 px - File -> Options -> Report settings
Theme	View -> Themes -> Browse for themes -> powerbi/theme_mf_analytics.json
Page view	View -> Page view -> Actual size (so pixel positions are exact)

Step 1

Header Bar

Insert -> Shapes -> Rectangle

Size & pos	W: 1280 H: 44 X: 0 Y: 0
Fill	Gradient - Direction: Left-to-Right Stop 1: #0078D4 Stop 2: #005A9E
Border	OFF
Shadow	OFF

Insert -> Text box (main title, over the rectangle)

Text	Mutual Fund Analytics Platform
Font	Segoe UI 14pt Bold White
Position	X: 52 Y: 12

Insert -> Text box (subtitle line)

Text	Azure SQL * 11 Funds * 500 Investors * Last refresh: 01 Jun 2026, 07:30 IST
Font	Segoe UI 9pt Regular #BFE6FF
Position	X: 52 Y: 28

TIP: Lock the header rectangle so you don't accidentally move it.
Right-click the rectangle -> Lock (or use the Selection pane: View -> Selection).

Step 2

Toolbar Strip + Asset Class Slicer

Insert -> Shapes -> Rectangle (toolbar background)

Size & pos	W: 1280 H: 30 X: 0 Y: 44
Fill	White
Border	Bottom border only - color #E1E1E1 - 0.5 px

Visualizations -> Slicer (asset class filter)

Field	vw_fund_performance[asset_class]
Style	Format -> Slicer settings -> Style: Tile
Orientation	Format -> Slicer settings -> Orientation: Horizontal
Selection	Multi-select with Ctrl: OFF Show 'Select all': ON
Font	Segoe UI 9pt
Size & pos	W: 550 H: 24 X: 80 Y: 48
Tile colors	Default: bg #F5F5F5 Selected: bg #0078D4 text White

Insert -> Text box (right side of toolbar)

Text	Auto-refresh: Daily 07:30 IST * ADF Pipeline Active
Font	Segoe UI 9pt #A0A0A0
Position	X: 980 Y: 53

Step 3

Three KPI Cards

Use the NEW Card visual (not the legacy Card). Click Visualizations -> Card (new).
All three cards sit in a row below the toolbar. The top accent bar is added as a 3px top border in Format -> Visual border.

Card 1 - Portfolio AUM (Blue)

Callout value	[Total AUM (Formatted)] -> Segoe UI 22pt Bold #252423
Category label	Portfolio AUM -> 10pt #605E5C
Reference label	[AUM YoY %] -> 9pt #107C10
Top border	Color #0078D4 Width 3px Top side only
Background	White Border #E8E8E8 0.5px Rounded 8px
Position & Size: W=390 H=90 X=14 Y=82	

Card 2 - Beating Nifty 50 (Green)

Create this helper measure first (New measure in Executive_measures):

Beating KPI Label = [Funds Beating Benchmark] & " / " & [Total Funds Count]	
Callout value	[Beating KPI Label] -> 22pt Bold
Category label	Beating Nifty 50 -> 10pt #605E5C
Reference label	[Funds Beating Benchmark %] -> 9pt #107C10
Top border	Color #107C10 Width 3px
Position & Size: W=390 H=90 X=412 Y=82	

Card 3 - Best Risk-Adjusted (Amber)

Create this helper measure first:

Best Sharpe Label = "Sharpe: " & FORMAT([Best Sharpe Ratio], "0.00") & " * Beta: " & FORMAT([Best Sharpe Beta], "0.00")	
Callout value	[Best Sharpe Fund] -> 15pt Bold (fund name is long)
Category label	Best Risk-Adjusted -> 10pt #605E5C
Reference label	[Best Sharpe Label] -> 9pt #605E5C
Top border	Color #FFB900 Width 3px
Position & Size: W=390 H=90 X=814 Y=82	

Step 4

MetricSelector Slicer (Dynamic Bar Chart Switch)

This slicer drives the Fund Ranking bar chart. When the user clicks a tile, [Selected Metric Value] switches to that column from vw_fund_performance, and [Fund Rank] re-ranks automatically.

Visualizations -> Slicer

Field	MetricSelector[Metric Name]
Style	Format -> Slicer settings -> Style: Tile
Selection	Single select (only one metric at a time)
Default	Click 'CAGR 5Y' tile before saving
Tile colors	Unselected: bg #F5F5F5 text #605E5C Selected: bg #0078D4 text White
Font	Segoe UI 8pt

Position & Size: W=450 H=26 X=14 Y=182

MetricSelector table must have these 5 rows (verify in Data view):

Order 1 - CAGR 1Y Order 2 - CAGR 3Y Order 3 - CAGR 5Y
Order 4 - Sharpe Ratio Order 5 - Alpha

If the table is empty, add rows manually: Enter data -> type rows above.

Edit interactions: After placing this slicer, click it -> Format -> Edit interactions.
Set it to FILTER only the bar chart (Step 5). Set it to NONE for all other visuals on the page so that clicking Sharpe doesn't change the KPI cards or scatter.

Step 5

Fund Ranking Bar Chart

Visualizations -> Clustered bar chart (horizontal)

Y-axis (rows)	vw_fund_performance[base_fund_name]
X-axis (values)	[Selected Metric Value]
Filters pane	Add filter -> vw_fund_performance[is_benchmark] -> is False
Sort	Click ? on visual -> Sort by -> [Fund Rank] -> Ascending

Format settings:

X-axis	OFF (hide to keep chart clean)
Y-axis	Font Segoe UI 9pt Color #252423
Data labels	ON Font 8pt White Position: Inside end
Title text	Fund Ranking 11pt Bold #252423
Chart badge	Add text box overlay: 'Dynamic' bg #EBF3FB text #0078D4 8pt
Background	White Border #E8E8E8 0.5px Rounded corners 8px

Position & Size: W=450 H=280 X=14 Y=210

Conditional bar color (Format -> Data colors -> fx -> Rules):

Condition	Color	Hex
Value >= 0.15 (15%)	Green	#107C10
0.08 <= Value < 0.15	Amber	#FFB900
Value < 0.08 (8%)	Red	#E74856

Step 6

Risk vs Return Scatter Chart (Signature Visual)

This is the headline visual of the dashboard. Each bubble is one fund, positioned by its volatility (X) and CAGR 5Y (Y). Two dashed reference lines from the benchmark divide the canvas into 4 labelled quadrants.

Visualizations -> Scatter chart

X-axis	vw_fund_performance[std_dev_1y] -> label 'Volatility (Std Dev %)'
Y-axis	vw_fund_performance[cagr_5y] -> label 'CAGR 5Y %'
Details	vw_fund_performance[base_fund_name] (one bubble per fund)
Size	vw_fund_performance[sharpe_ratio] (bubble sized by Sharpe)
Tooltips	Add [Quadrant Label] measure + alpha + max_drawdown
Filters pane	vw_fund_performance[is_benchmark] -> is False

Reference lines (Analytics pane -> Constant line):

Line	Value	Label	Color	Style
Horizontal (Y)	11.67	Nifty 5Y Return	#A4262C	Dashed 1.5px
Vertical (X)	21.85	Nifty Volatility	#A4262C	Dashed 1.5px

Quadrant text boxes (Insert -> Text box, placed manually inside scatter area):

Position	Text	Text color	Fill color
Top-left	EFFICIENT	#107C10	#E8F5E9
Top-right	HIGH RISK	#856400	#FFF8E1
Bottom-left	DEFENSIVE	#0078D4	#EBF3FB
Bottom-right	AVOID	#A4262C	#FFEBEE

Legend	Format -> Legend -> ON Position: Bottom 8pt
Legend colors	Efficient #107C10 High Risk #FFB900 Defensive #0078D4 Avoid #A4262C
Background	White Border #E8E8E8 Rounded 8px
Position & Size: W=310 H=280 X=476 Y=182	

The reference line values (11.67 and 21.85) are live values from [Benchmark Return] and [Benchmark Volatility] measures. If the data refreshes, update these constant line values by re-running the DAX query: EVALUATE ROW("R", [Benchmark Return], "V", [Benchmark Volatility])

Step 7

Needs Attention Table

Visualizations -> Table

Columns	base_fund_name -> sharpe_ratio -> max_drawdown -> cagr_1y
Column labels	Fund -> Sharpe -> Max DD -> 1Y Ret
Formats	Sharpe: 0.00 Max DD: 0.0% 1Y Ret: 0.0%
Filter	sharpe_ratio < 0 OR max_drawdown < -20 (use Filters pane on visual)
Sort	sharpe_ratio Ascending (worst Sharpe at top)
Header	bg #0078D4 text White Bold 9pt
Grid lines	#F5F5F5 0.5px Row highlight on hover: #F8F9FA
Background	White Border #E8E8E8 Rounded 8px
Position & Size: W=390 H=140 X=798 Y=182	

Conditional font color rules:

Column	Condition	Font color
Sharpe	> 1.0	#107C10 (green)
Sharpe	0 to 1	#856400 (amber)
Sharpe	< 0	#A4262C (red)

Max DD	> -15%	#107C10 (green)
Max DD	-25% to -15%	#856400 (amber)
Max DD	< -25%	#A4262C (red)
1Y Ret	< 0%	#A4262C (red)

Step 8

Asset Class Mix Donut Chart

Visualizations -> Donut chart

Legend	vw_fund_performance[asset_class]
Values	Count of vw_fund_performance[base_fund_name]
Filter	vw_fund_performance[is_benchmark] = False
Inner radius	50% (Format -> Slices -> Inner radius)
Detail labels	OFF
Legend	Position: Bottom Font 8pt Show value %
Background	White Border #E8E8E8 Rounded 8px

Position & Size: W=390 H=140 X=798 Y=324

Slice colors (Format -> Colors -> assign manually):

Asset Class	Color name	Hex
Equity ETF	Blue	#0078D4
Index Fund	Teal	#00B294
Gold	Amber	#FFB900
Liquid	Red	#E74856
Other / Debt	Grey	#8A8886

Step 9

Fund Performance Matrix (Full-Width Bottom Table)

This is the most data-rich visual on the page. It shows all 11 funds with every metric in one heat-mapped table. Place it spanning the full width at the bottom of the canvas.

Visualizations -> Table

Filter	vw_fund_performance[is_benchmark] = False
Sort	cagr_5y Descending
Header	bg #0078D4 White Bold 9pt
Values font	Segoe UI 8.5pt
Row grid	#F5F5F5 0.5px Hover: #F8F9FA
Background	White Border #E8E8E8 Rounded 8px

Position & Size: W=1252 H=155 X=14 Y=508

Columns - add in this order:

#	Display name	Field	Format
1	Fund Name	vw_fund_performance[base_fund_name]	Text
2	CAGR 1Y	vw_fund_performance[cagr_1y]	0.0%
3	CAGR 3Y	vw_fund_performance[cagr_3y]	0.0%
4	CAGR 5Y	vw_fund_performance[cagr_5y]	0.0%
5	Sharpe	vw_fund_performance[sharpe_ratio]	0.00
6	Sortino	vw_fund_performance[sortino_ratio]	0.00
7	Beta	vw_fund_performance[beta]	0.00
8	Alpha	vw_fund_performance[alpha]	0.0%
9	Max DD%	vw_fund_performance[max_drawdown]	0.0%

Conditional formatting (Format -> Cell elements -> Background color -> Rules):

Column	Green (#E8F5E9)	Amber (#FFF8E1)	Red (#FFEBEE)
CAGR 1/3/5Y	> 15%	5% - 15%	< 5%
Sharpe	> 1.0	0 - 1.0	< 0
Sortino	> 1.0	0 - 1.0	< 0

Alpha	> 10%	0 - 10%	< 0%
Beta	< 0.7	0.7 - 1.0	> 1.0
Max DD%	> ?15%	?25% to ?15%	< ?25%

Footer Bar

Size & pos W: 1280 H: 22 X: 0 Y: 778
Fill White | Top border #E1E1E1 0.5px

Text	Page 1 of 4
Style	Three small rectangles as tab indicators (draw manually as tiny shapes)
Position	X: 14 Y: 783

Text	mf_analytics_dashboard.pbix * Azure SQL: mf-analytics-db
Font	Segoe UI 8pt #A0A0A0
Position	X: 900 Y: 783

HEADER (gradient #0078D4 -> #005A9E) title + subtitle		44px
TOOLBAR (white) [Asset Class Slicer tiles] Auto-refresh text		30px
[KPI: AUM -- 390px]	[KPI: Beating -- 390px]	[KPI: Best Sharpe -- 390px]
		90px
[MetricSelector]		
[Fund Ranking	Risk vs Return	Needs Attention table
Bar Chart	Scatter Chart	Asset Class Mix donut
450 x 280px]	310 x 280px]	390 x 280px]
Fund Performance Matrix (full width 1252px)		155px
Fund	CAGR1Y	CAGR3Y
CAGR5Y	Sharpe	Sortino
Beta	Alpha	MaxDD
FOOTER Page 1 of 4 * mf_analytics_dashboard.pbix * Azure SQL		22px

- [x] File -> Save (Ctrl+S)
- [x] Click MetricSelector slicer -> select 'CAGR 5Y' as default
- [x] Verify bar chart sorts correctly with CAGR 5Y selected
- [x] Verify scatter shows 11 dots with reference lines crossing
- [x] Verify matrix shows all 11 funds with colour-coded cells
- [x] Lock header + footer rectangles (Selection pane -> lock icon)
